Total War's Beta is doing well, we already made some changes following player's updates. You'll receive an automatic update once you put the old version on. New Version 1249 includes life meter and some fine tunings to damage and life recharge rate. We also released the shrines for beta testing, available on demand. Shrines focus on clan management, clan wars, alliance, and includes a clan/alliance communication system.

Ask for a shrine now to Teclo Flow or Vinavil McMillan.
